

UXify Team – Sakkan App

About App:

- Sakkan is a mobile application for Student accommodation for youth between 19 and 30. We made this app to solve their problems and make a suitable journey for them.

Problem Statement:

- Students have difficulty finding suitable accommodation that combines safety, proximity to the University, and a reasonable price.
- The current options are unregulated and lack transparency, forcing students to make quick and ill-considered decisions.
- This directly affects their psychological comfort and study concentration.

Solutions:

- Application makes it easier for students to access the right housing according to their needs.
- Minimize exposure to fraud from property owners.
- Provide a suitable experience that fits into each category.
